

HOW TO FIND US

IVIVA MEDICAL LOCATION

IVIVA Medical is located inside the Northshore Innoventures (NSIV) biotech and cleantech incubator in the Cummings Center in Beverly, MA. Suite 451C can be accessed from any point in the 100 Building, however it is ¼ mile long so if driving we recommend parking close to the 150 or 165 number entrances as those are closest to NSIV. Our suite is located on the fourth floor.

DIRECTIONS

DRIVING: From Rt. 128, take the exit for Rt. 62 east into Beverly. Cummings Center will be on your left in about 2 miles or so. Turn left into the main entrance. Drive straight past the information booth and keep the 100 Building on your right. Drive to the door marked 150J (big flag) on your right. You can park in the lot opposite that door or in the 1 hr parking places near the building, if you are not going to be staying for much more than an hour. Enter through the door marked 150J. Walk straight down the hall to the elevator on your left. (About 2/3 of the way down the hall.) Take the elevator to the 4th floor. The main entrance to NSIV will be directly in front of you when you exit the elevator.

COMMUTER RAIL: From the Beverly Depot, walk to the street behind the station and turn right. Continue walking past Federal Street until you reach Elliott Street (about 0.5 miles). You will see the Cummings Center directly across the street. Enter the 100 Building through the door marked 100E. Walk straight ahead until the hallway ends and turn right to find the elevator. Take the elevator to the 4th floor, turn right and continue walking toward the rear of the building. Suite 451C will be on your right. See the MTBA train schedule for service to the [Beverly Depot](#). Taxis are also available on Park Street in front of the station.

NAVIGATING INSIDE CUMMINGS CENTER

Navigating Cummings Center is easy once one knows that the suites are numbered according to a logical grid pattern, with numbers on one axis and letters on the other. Visit <http://www.cummings.com/floors.html> for more information on the suite numbering system, which may help clients and visitors better understand how to get from point A to point B.
